## PROJECTS DETAILS

### • Portfolio Application

I developed a portfolio project using the MERN stack and Cloudinary, designed to showcase my skills, certifications, and detailed descriptions of my other projects. This project highlights my proficiency in web development and my ability to create dynamic, responsive, and visually appealing web applications.

### • JobPortal Application

HireNet is a MERN stack-based web application I developed, allowing students and professionals to find jobs tailored to their skills and requirements. This platform aims to streamline the job search process, providing a user-friendly interface and robust functionality to connect job seekers with potential employers efficiently.
